Scott Neufeld, Director of Risk Management
&
Geoff Sinclair, Director of Claims Services
Agenda

• Drones
• Questions
We Love Drones!
Skyward math lessons
Teachers learn how to navigate drones to be used in class

Hunter Marrow The Argus Observer  Jul 20, 2010  0
Coming soon with an SDAO Risk Management Consultant near you
Safety is everyone's responsibility. Unmanned aircraft must never interfere with manned aircraft operations. B4UFLY provides situational awareness of your current or planned operational area, as well as additional reference resources.

⚠️ **Warning - Action Required**

✈️ You are within 5 miles of an airport

By Law, you must notify the airport operator and the air traffic control tower (if one is present) of your flight.
Drones

What is a drone???????
Drones

KNOW THE RULES!
Why is it important to know the rules?

Fines

Coverage
What are the Rules?

The Rules Are Continuously Changing
Recreational / Hobby Use

Rule 336 – Education Use of UAS (Students)

C.O.A. – Employees, volunteers and agents

Part 107 – Employees, volunteers and agents

• What does this mean for your entity?
The FAA requires notification of certain UAS accidents.
Public Agencies must register their drones with ODA
Annual report on drone use submitted to ODA
Fly for Work/Business

What are the requirements:

Pilot
Aircraft
Operating Rules
Pilot Requirements
Aircraft Requirements
Drones

More information can be found on the FAA website:

Drone Compliance Software Assistance

We don’t make the drones. **We make them useful.**
We take care of the **COMPLIANCE MANAGEMENT** so you can get the **data**.
