Full Day Training Includes Training Materials, Continental Breakfast & Lunch

REGISTER ONLINE AT <https://cascadetech.wildapricot.org/event-3006763>

The Oregon Legislature passed House Bill 2931 in 2015 to assess elevated radon in Oregon Schools. HB 2931 later became known as Oregon Revised Statute 332.166-167 which requires radon testing in Oregon Schools on or before January 1, 2021.

The NW Regional Education Service District has collaborated with the *Environmental Protection Agency*, the *Oregon Health Authority*, *Cascade Radon* and *Intermountain ESD* to organize training for school custodial and maintenance personnel who will be doing radon testing in Oregon Schools.

The training fee covers continental breakfast, lunch and training materials. Training will be a full day, 8:00 a.m. – 3:30 p.m., with classroom instruction in the morning hours and hands-on testing in a local setting in the afternoon.

Presenters for this training will include Radon experts from EPA, OHA, and Cascade Radon, Portland. This will be a high-quality training opportunity that we hope you will take advantage of.
